

IN THE SPECIFICATION

Please replace the paragraph on page 4, lines 1-10, with the following paragraph:

Referring to Figure 2, in one embodiment, the array display 10 includes an optical integrator plate 16, placed over the emissive side of each panel 12. Each plate 16 may have a black matrix (not shown in Figure 2) formed on the rear side 18 of the plate 16 to obscure seams and gaps between adjacent pixels. In such case, a gap 14 exists between adjacent plates 16 (such as the plates 16a and 16b) and between underlying adjacent panels 12 (such as the panels 12a and 12b). Each module 15 may include front and back sections 19 18 and 20 respectively.
